COURSE CONTENT

3E6: Organisational Behaviour is an eight-lecture course delivered in the Michaelmas term. Organisational behaviour (OB) studies the psychology and work-related activities of employees and workgroups in an organisational context. Employees in organisations experience various issues related to the field of OB and should be aware of how these issues affect their working lives. The topics in this course include organisational culture, attitudes, perceptions, motivations, leadership, team dynamics, understanding personalities and more.

Students enrolled in this course will become familiar with theories and research in OB and will learn to think critically about the research in OB. I encourage you to think of yourself not as a student but as a “manager in training” to get the most out of this course.

Because your organisational experience may be somewhat limited at this stage, I will do my best to create *in-class activities* that enable you to apply your learning to the real world. My goal is that you will learn as much as possible about organisational behaviour and will be able to exploit its practical applications.

EXPECTATIONS

- Students will demonstrate familiarity with the major concepts, theoretical perspectives, empirical findings and historical trends in OB.
- Students will use critical and creative thinking skills and the scientific approach to solve practical problems in organisations.
- Students will understand and apply OB principles to personal, social and organisational issues.
- Students will develop insight into their own and others' behaviours and mental processes and adopt effective strategies for self-management and self-improvement.
- Students will develop realistic ideas about implementing their OB knowledge and skills in occupational pursuits in a variety of settings.
- Students will proactively seek resources to facilitate their learning.

LECTURER

Dr. Caroline is an Assistant Professor in Leadership at Henley Business School and Teaching Staff at Judge Business School. She teaches and researches in the area of leadership, organisational behaviour and change.

OFFICE HOUR

Please email me to set up a meeting via MS Teams.

Note: The topical order of the eight lectures may change. The order is not important at all because each topic is independent of the others.

ASSESSMENT

Your grade will be determined by exam only. Normally, it comprises three questions, of which two must be answered.

TUTORIALS

Instead of supervisions, 3E6 will implement tutorial sessions that students are recommended to attend online. The tutorial sessions will total 3 hours, which could be divided into three one-hour sessions. Supervision questions or case studies will be distributed one week in advance. These questions/case studies will be addressed during the tutorials, and students will have the opportunity to ask questions about them.

The final tutorial may take place in Lent and will focus on students' questions regarding the final examination. Recordings of the tutorials will be available to all students for 30 days.

COURSE WORK

You may choose to submit coursework. This may be used to contribute to the coursework part of your portfolio; it does not form part of the assessment for this module. The coursework consists of an essay of maximum 2,000 words (excluding titles, footnotes, figures, references).

Assessment criteria for essays are:

- clear, accurate and relevant to the question set and supported by appropriate use of a business case;
- effective organisation and prioritisation of material; usually, on the basis of a theme or argument (a collage of information with no coherent argument should be avoided);
- clear and logical analyses with theory and a business case used to advance the analysis;
- knowledge of relevant lecture material and related literature;
- creativity in discussion and analyses.

You must submit your essay by **Monday, 15th December 2025, 5pm** via Moodle. Late submissions will be penalized.

The Topic of Course Work (Case Study)

Why should organisations invest in employee mental health and well-being? Critically examine the organisational, ethical, and performance-related reasons for supporting employee mental health, drawing on relevant theories, and build a case for this. In your response, consider:

- The relationship between mental health, employee engagement, and productivity
- Organisational culture and leadership's role in supporting well-being
- Ethical responsibilities
- The long-term impact of neglecting employee mental health
- Relevant Organisational Behaviour theories

READING LIST

General Reading

The text for the course is:

Robbins, S. P. and Judge, T. A. (2024)	<i>Organizational Behavior: Global edition.</i> (19 th ed.). Pearson.	Ebook via iDiscover Printed book at: HD58.7.R62 O7 2019
--	--	--

There is also an abbreviated version of this book, which covers the issues we discuss in class in more brevity:

Robbins, S. P. and Judge, T. A. (2021)	<i>Essentials of Organizational Behavior.</i> (15 th ed.). Pearson.	E-book via iDiscover Printed books at: HD58.7.R62 E8 2018

There is also a plethora of more basic introductory textbooks that usually carry the term organisational behaviour in their title. You may find such books in the Cambridge University libraries.

Detailed Reading

The required readings are essential for this course and provide the basic knowledge for the exam. There is no expectation that you will read all the articles marked as optional reading. You should, however, read a selection for the supervision essays to prepare yourself for the exam. The suggested articles are necessarily selective and by no means exhaustive; they serve as an inspiration and should encourage you to search for further work in the journals in which the optional readings have appeared.
